

SPS 750 Structure Defense Sprinkler

Features:

- Spider-like leg pattern so it sits stable on steep rooftops
- 3/4" GHT hose connection (garden hose)
- Produces a 110' circle using 10gpm at 50psi
- Spray coverage of approx 9500 square feet (based on your water pressure)
- Removable legs for storage optimization.
- Useful for prescribed fires as well as stubborn fires like manure, hay, tires, etc
- Hose not included

Quick SPS structure protection sprinkler facts:

- Offers quick deployment and can alleviate the need to have live personnel to provide structure protection in a wildfire
- Useful for prescribed fires, as well as stubborn fires like manure, hay, tires, etc.
- Sprinklers have removable legs for convenient storage
- For fire agencies, a number of Monsoon Sprinkler kits can provide structure protection for many homes with a small crew
- For water sources that are far from the area to be defended, we offer water supply kits
- Homeowners should consult with local fire agencies regarding need and deployment of a Monsoon Structure Defense System
- Sprinklers offer a choice of a 3/4" hose connection (garden hose) or a 1" hose connection
- Sprinklers cover a 110 foot circle using 10 gallons per minute at 50psi pressure
- Each sprinkler covers 9500 square feet.
- A combination of 5 sprinklers (a Monsoon Kit) will adequately defend a 2500 square foot home and the defensible space around it.
